**Market today: Slightly surpassing the old peak**

(Phuong Nguyen – [phuong.nh@vdsc.com.vn](mailto:phuong.nh@vdsc.com.vn))

- The market continued to increase and surpass the old peak, the 1,277 point area.
- It is expected that the market will continue to struggle in the next trading session, but it is likely that the market still receive support and gradually increase.

The market continued to be in green when it entered the weekend trading session. After a rapid increase at the beginning of the session, the market quickly cooled down and fluctuated stably above 1,280 points. Although there was selling pressure in the afternoon session, the market still tried to return to above 1,280 points. At the end of the session, VN-Index increased 5.38 points (+0.42%), closing at 1,281.8 points. Matching liquidity increased with 1,180.8 million shares matched on HOSE.

VN30 group increased 2.57 points (+0.2%), closing at 1,284.14 points. In the group, there were 15 gainers such as CTG (+2.3%), BID (+2.3%), VCB (+1.3%), MWG (+1.2%), MBB (+1, 2%) ... On the contrary, there were 12 losers, namely PLX (-1.2%), FPT (-1.1%), SSB (-0.9%), VNM (-0.9 %), VRE (-0.9%)....

With the market's slight increase, the divergence is more prominent, industry groups increase and decrease alternately, and many industry groups had slight fluctuations. Banking still had efforts to support the market with exciting developments of 3 state-owned banks. Besides, some industry groups had quite good increases such as Electrical Equipment group, Steel group, Securities group....

Foreign investors continued to be net sellers on HOSE, with a value of 464.4 billion VND. In particular, they sold strongly in VNM (-219.3 billion), HPG (-136 billion), VHM (-115.7 billion), DIG (-77.9 billion), PVD (-69.7 billion) ... However, they bought a lot at GEX (+192.3 billion), KBC (+147.3 billion), PDR (+122.3 billion), VCB (+78.8 billion), STB (+42.1 billion)...

*The market continued to increase and surpass the old peak, the 1,277 point area. Although market movements were cautious and disputes were strong, liquidity still increased compared to the previous session, showing that cash flow still supports the market in spite of increased profit-taking supply. It is expected that the market will continue to struggle in the next trading session, but it is likely that the market will receive support and gradually increase. Strong disputes will continue in the near future because profit-taking supply tend to increase. Therefore, investors can expect the possibility of expanding the market's uptrend but you need to observe supply and demand developments during this uptrend. Currently, priority should be given to stocks that are showing good signals from the support zone to hold, but you should consider taking profits on stocks that increase rapidly to the resistance zone.*
