IMPORTANT DISCLOSURES FOR U.S. PERSONS

This research report was prepared by Viet Dragon Securities Corp. ("VDSC"), a company authorized to engage in securities activities in Vietnam. VDSC is not a registered broker-dealer in the United States and, therefore, is not subject to U.S. rules regarding the preparation of research reports and the independence of research analysts. This research report is provided for distribution to "major U.S. institutional investors" in reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act").

Additional Disclosures

This research report is for distribution only under such circumstances as may be permitted by applicable law. This research report has no regard to the specific investment objectives, financial situation or particular needs of any specific recipient, even if sent only to a single recipient. This research report is not guaranteed to be a complete statement or summary of any securities, markets, reports or developments referred to in this research report. Neither VDSC nor any of its directors, officers, employees or agents shall have any liability, however arising, for any error, inaccuracy or incompleteness of fact or opinion in this research report or lack of care in this research report's preparation or publication, or any losses or damages which may arise from the use of this research report.

VDSC may rely on information barriers, such as "Chinese Walls" to control the flow of information within the areas, units, divisions, groups, or affiliates of VDSC.

Investing in any non-U.S. securities or related financial instruments (including ADRs) discussed in this research report may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the U.S. Securities and Exchange Commission. Information on such non-U.S. securities or related financial instruments may be limited. Foreign companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect within the United States.

The value of any investment or income from any securities or related financial instruments discussed in this research report denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related financial instruments.

Past performance is not necessarily a guide to future performance and no representation or warranty, express or implied, is made by VDSC with respect to future performance. Income from investments may fluctuate. The price or value of the investments to which this research report relates, either directly or indirectly, may fall or rise against the interest of investors. Any recommendation or opinion contained in this research report may become outdated as a consequence of changes in the environment in which the issuer of the securities under analysis operates, in addition to changes in the estimates and forecasts, assumptions and valuation methodology used herein.

No part of the content of this research report may be copied, forwarded or duplicated in any form or by any means without the prior.

RESEARCH DISCLOSURES

Third Party Research

This is third party research. It was prepared by Rong Viet Securities Corporation (Rong Viet), with headquarters in Ho Chi Minh City, Vietnam. Rong Viet is authorized to engage in securities activities according to its domestic legislation. This research is not a product of Tellimer Markets, Inc., a U.S. registered broker-dealer. Rong Viet has sole control over the contents of this research report. Tellimer Markets, Inc. does not exercise any control over the contents of, or the views expressed in, research reports prepared by Rong Viet.

Rong Viet is not registered as a broker-dealer in the United States and, therefore, is not subject to U.S. rules regarding the preparation of research reports and the independence of research analysts. This research report is provided for distribution to "major U.S. institutional investors" and other "U.S. institutional investors" in reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act").

DISCLAIMER:

Any U.S. recipient of this research report wishing to effect any transaction to buy or sell securities or related financial instruments based on the information provided in this research report should do so only through Tellimer Markets, Inc., located at Floor 36, 444 Madison Avenue, Floor 36, New York, NY 10022. A representative of Tellimer Markets, Inc. is contactable on +1 (212) 551 3480. Under no circumstances should any U.S. recipient of this research report effect any transaction to buy or sell securities or related financial instruments through Rong Viet. Tellimer Markets, Inc. accepts responsibility for the contents of this research report, subject to the terms set out below, to the extent that it is delivered to a U.S. person other than a major U.S. institutional investor.

None of the materials provided in this report may be used, reproduced, or transmitted, in any form or by any means, electronic or mechanical, including recording or the use of any information storage and retrieval system, without written permission from.

Rong Viet is the employer of the research analyst(s) responsible for the content of this report and research analysts preparing this report are resident outside the U.S. and are not associated persons of any U.S. regulated broker-dealer. The analyst whose name appears in this research report is not registered or qualified as a research analyst with the Financial Industry Regulatory Authority ("FINRA") and may not be an associated person of Tellimer Markets, Inc. and, therefore, may not be subject to applicable restrictions under FINRA Rules on communications with a subject company, public appearances and trading securities held by a research analyst account.

Tellimer Markets, Inc. or its affiliates has not managed or co-managed a public offering of securities for the subject company in the past 12 months, has not received compensation for investment banking services from the subject company in the past 12 months, and does not expect to receive or intend to seek compensation for investment banking services from the subject company in the next three months. Tellimer Markets, Inc. has never owned any class of equity securities of the subject company. There are no other actual, or potential, material conflicts of interest of Tellimer Markets, Inc. at the time of the publication of this report. As of the publication of this report, Tellimer Markets, Inc. does not make a market in the subject securities.

About Tellimer

Tellimer is a registered trade mark of Exotix Partners LLP. Exotix Partners LLP and its subsidiaries ("Tellimer") provide specialist investment banking services to trading professionals in the wholesale markets. Tellimer draws together liquidity and matches buyers and sellers so that deals can be executed by its customers. Tellimer may at any time, hold a trading position in the securities and financial instruments discussed in this report. Tellimer has procedures in place to identify and manage any potential conflicts of interests that arise in connection with its research.

A copy of Tellimer's conflict of interest policy is available at www.tellimer.com/regulatory-information.

Distribution

This report is not intended for distribution to the public and may not be reproduced, redistributed or published, in whole or in part, for any purpose without the written permission of Tellimer. Tellimer shall accept no liability whatsoever for the actions of third parties in this respect. This report is for distribution only under such circumstances as may be permitted by applicable law. This report may not be used to create any financial instruments or products or any indices. Neither Tellimer, nor its members, directors, representatives, or employees accept any liability for any direct or consequential loss or damage arising out of the use of all or any part of the information herein.

United Kingdom: Distributed by Exotix Partners LLP only to Eligible Counterparties or Professional Clients (as defined in the FCA Handbook). The information herein does not apply to, and should not be relied upon by, Retail Clients (as defined in the FCA Handbook); neither the FCA's protection rules nor compensation scheme may be applied.

UAE: Distributed in the Dubai International Financial Centre by Exotix Partners LLP (Dubai) which is regulated by the Dubai Financial Services Authority ("DFSA"). Material is intended only for persons who meet the criteria for Professional Clients under the Rules of the DFSA and no other person should act upon it.

Other distribution: The distribution of this report in other jurisdictions may be restricted by law and persons into whose possession this document comes should inform themselves about, and observe, any such restriction.

Disclaimers

Tellimer and/or its members, directors or employees may have interests, or long or short positions, and may at any time make purchases or sales as a principal or agent of the securities referred to herein. Tellimer may rely on information barriers, such as "Chinese Walls" to control the flow of information within the areas, units, divisions, groups of Tellimer.

Investing in any non-U.S. securities or related financial instruments (including ADRs) discussed in this report may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the U.S. Securities and Exchange Commission. Information on such non-U.S. securities or related financial instruments may be limited. Foreign companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect within the United States. The value of any investment or income from any securities or related financial instruments discussed in this report denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related financial instruments.

Frontier and Emerging Market laws and regulations governing investments in securities markets may not be sufficiently developed or may be subject to inconsistent or arbitrary interpretation or application. Frontier and Emerging Market securities are often not issued in physical form and registration of ownership may not be subject to a centralised system. Registration of ownership of certain types of securities may not be subject to standardised procedures and may even be effected on an ad hoc basis. The value of investments in Frontier and Emerging Market securities may also be affected by fluctuations in available currency rates and exchange control regulations. Not all of these or other risks associated with the relevant company, market or instrument which are the subject matter of the report are necessarily considered.

TABLE OF CONTENTS

	<u>STOCK MARKET IN FEBRUARY 2025</u>
	<u>MARKET OUTLOOK AND RECOMMENDATIONS</u>
	<u>STOCK OF THE MONTH</u>
	<u>APPENDIX</u>

At the close of trading on February 28, 2025, VN-Index ended at 1.305,36 points, marking a 3,19% MoM increase. Average matched trading value on HOSE reached VND 14.270 billion per session, up 51% MoM. HNX-Index rose to 239,19 points (+7,03% MoM), and UpCOM Index climbed to 99,58 points (+5,6% MoM), with average matched trading value on HNX at VND 963 billion (+50% MoM) and UpCOM at VND 907 billion (+60,2% MoM).

In February 2025, foreign investors continued their net selling trend, offloading VND 9.592 billion through both matched orders and negotiated transactions, with significant outflows from technology (FPT: -VND 1.334 billion) and consumer sectors (VNM: -VND 1.119 billion, MSN: -VND 979 billion). In contrast, domestic capital, particularly from retail investors, surged significantly, supporting market liquidity and driving stock prices higher. key market highlights in February 2025

- On February 10, President Trump announced a 25% tariff on all imported steel and aluminum with no exemptions for trade partners. On February 13, he signed a reciprocal tariff plan, effective April 2, targeting countries with high tariffs on U.S. goods. On February 26, Trump further announced a 25% tariff on EU auto imports.
- On February 10, Vietnam's Prime Minister met with leading domestic corporations to discuss solutions for financial difficulties and business recovery following an economic slowdown.
- The 9th Extraordinary Session of the 15th National Assembly commenced on February 12, where lawmakers approved key amendments and resolutions to support Vietnam's economic and social development, including revisions to laws and policies and a supplementary economic growth plan targeting 8% GDP growth in 2025.
- February 24, 2025, marked the third anniversary of Russia's military operation in Ukraine. Amid prolonged conflict and heavy losses, peace negotiations between Russia and the U.S. began, offering hope for a resolution, although significant disagreements remain.
- On February 26, 2025, the State Bank of Vietnam (SBV) directed commercial banks to maintain stable deposit rates and reduce lending rates to support economic growth, with a minimum GDP growth target of 8% for 2025. The SBV also urged banks to cut costs, streamline procedures, and share profits to support businesses, with a focus on credit expansion in consumption, exports, digital transformation, and technology sectors.

Figure 16: Similar to ASEAN, foreign investors were net sellers in Asian markets in February (Million USD)

Source: Bloomberg, RongViet Securities. Data as of February 28, 2025.

As of now, the market has largely priced in Q4/2024 earnings results. We forecast that the positive momentum and market re-rating trend will continue in March, with a target P/E of 13.3x, a reasonable valuation level we outlined in our 2025 strategy report.

Key factors supporting this trend include: 1) Expectations for Vietnam's market upgrade by FTSE in March, as the country has met all required criteria; 2) Progress in the KRX trading system implementation, with HoSE issuing an official notice on February 26, 2025, instructing securities firms to prepare data for system testing. We believe the April 30 - May 1 holiday period (5 days) provides a sufficient window for final testing before the go-live phase; 3) the government's strong commitment to 8% GDP growth in 2025 will support an accommodative credit environment and streamlined administrative procedures, fostering private sector investment. The AGM season for listed companies will also bring fresh insights into expansion plans, business outlooks, and dividend policies, potentially driving stock prices higher.

We maintain our cautious view on the escalating US-China trade war and tensions with long-standing US allies, which could impact global markets, particularly in inflation expectations, economic growth, and monetary policy decisions. Compared to last month, trade tensions have intensified, with new tariff rounds between US, Canada, Mexico, and China now taking effect. The global market may witness heightened volatility, tensions, 2018, when trade negotiations stalled. However, Vietnam's stock market is expected to be more resilient than global markets, supported by attractive valuation levels and superior growth prospects relative to regional and global peers, as well as the low probability of US-imposed tariffs on Vietnam in 2025, positioning the country as a potential beneficiary of global superpower competition.

We expect VN-Index to trade within **1.280 – 1.350 range**. The above-mentioned catalysts should help the market achieve a P/E target of 13,3x, but risks related to trade tensions, or a delayed FTSE market upgrade could trigger market corrections. With the current P/E at 12,7x, we believe that the investment accumulation opportunity outweighs downside risks. However, investors should diversify their portfolios, focus on sectors with strong growth prospects, and select stocks with reasonable valuations to mitigate risks during potential volatility.

For investment ideas, we increase exposure to the Banking sector, adding **VCB (GMT: VND 114.100, +22%)** to our strategic portfolio. We also highlight **PHR (GMT: VND 80.000, +21%)** as the top stock pick of the month, given its compelling land conversion story, making it an attractive medium-to-long-term investment.

Figure 17: Global stock indices move during the 1st trade war (2018-2019)

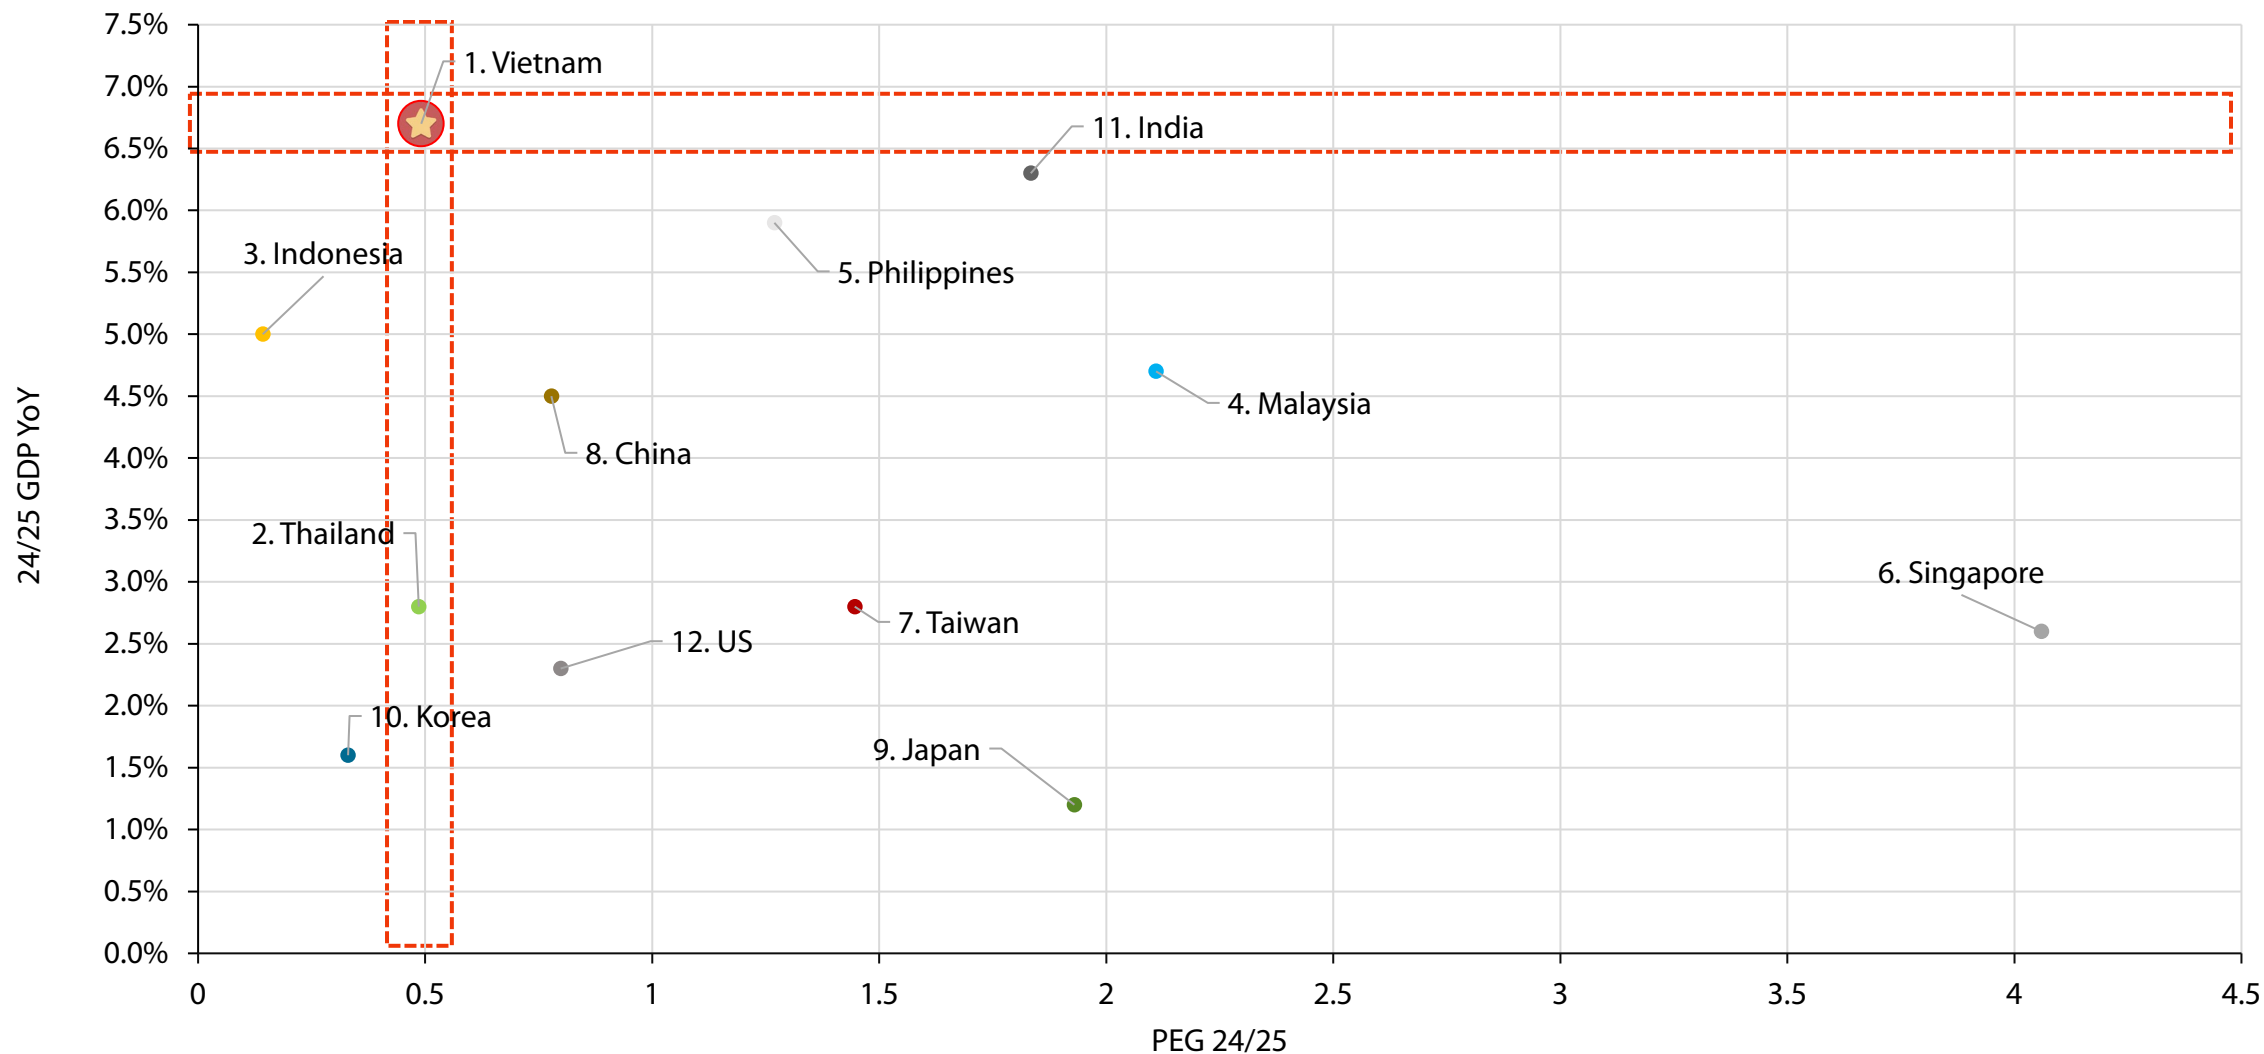

Table 4: Profit growth outlook, valuation, and economic growth across markets, according to consensus data from Bloomberg – The current market valuation and growth outlook are attractive compared to the region and globally. This implies that the impact on the market from a global correction will not be too severe.

Impact Factors	Rating	Our view in brief
Economic indicators		The economy started the year on a relatively positive note, although it has yet to make a significant breakthrough. Specifically, production activities have been impacted by seasonal factors but continue to maintain growth momentum, while exports remain favorable. Meanwhile, consumption continues to show improvement. The government has outlined plans to adjust the 2025 growth target to 8%, with key drivers for further acceleration being public investment and credit.
Monetary policy & credit growth		Early 2025, Vietnam's banking sector remains highly liquid, with interbank interest rates stable. However, new lending remains sluggish, with total outstanding credit nearly unchanged from the end of 2024, despite being higher than the same period last year. The State Bank of Vietnam (SBV) is prioritizing credit allocation to key sectors while strictly controlling lending to high-risk industries. Meanwhile, the loose monetary policy stance remains in place to keep inflation in check. Flexible measures are expected to stimulate credit growth in the production sector, support economic expansion, and maintain macroeconomic stability.
Fiscal policy		As of February 2025, public investment disbursement is estimated to have reached 6.9% of the annual plan, with central budget capital disbursement at 5.6%, lower than 7.52% in the same period last year. The slowdown is mainly due to procedural bottlenecks and land clearance issues in key infrastructure projects. While the 2025 state budget deficit of 3.8% of GDP provides fiscal space to support economic growth, delayed disbursement may weigh on the construction, materials, and overall demand sectors. The government is actively pushing for faster disbursement, which is expected to improve public investment flows in the coming quarters.
Earnings growth		In Q4/2024, the market-wide net profit grew by 34.7% YoY, marking the highest quarterly growth in the past five years. However, profit growth is expected to decelerate to 7% in Q1/2025, as the impact of the low-base effect from the previous year diminishes.
External factors		Fed remains cautious, with expectations of only two rate cuts in 2025, bringing rates down to 3,75%-4,0%, which helps sustain the USD's strength. Meanwhile, ECB continues monetary easing, cutting rates to 2,75% in January 2025, while BOJ raised interest rates to 0,5%, the highest level in 17 years. On the geopolitical front, Russia-Ukraine tensions show positive developments, with potential peace signals leading to a temporary decline in oil prices. However, US-China trade war could disrupt global supply chains, indirectly affecting Vietnam if tensions escalate. This may weaken consumer demand, negatively impact exports, and slow economic growth, potentially driving safe-haven demand for gold and USD.

With the market's P/E at 12,7x, we believe that the investment accumulation opportunity remains superior to downside risks. However, investors should focus on portfolio diversification, concentrating on sectors with strong growth prospects and selecting stocks with reasonable valuations to mitigate risks, especially during periods of heightened market volatility driven by external headwinds.

For investment ideas, we conduct a monthly rebalancing of our portfolio, maintaining an equal weight allocation for each stock. This month, we increase exposure to the banking sector, adding **VCB (GMT: VND 114,100, +22%)** to our strategic portfolio. The rationale behind this overweight position is that the banking sector continues to play a pivotal role in driving economic growth, especially amid the government's ambitious economic expansion targets. Moreover, banks remain the leading sector in driving market-wide earnings growth, and VCB is our top pick, given expectations of accelerated profit growth in 2025.

Ticker	Target price	Close price	Expected return	P/E 2025F	NPAT YoY% 2025F	P/B 2025F	ROE% 2025F	Investment thesis
CTG	49,000	41,500	18%	6.77	30%	1.24	20.12	<ul style="list-style-type: none"> Lower credit costs are expected to enhance profit growth and operational efficiency. After four years of aggressive provisioning, credit costs are projected to decline to 1.4% from 2025F-28F, supported by lower bad debt levels and improved asset quality (NPL ratio expected to fall to 1.1%, with provisioning buffer exceeding 200%). This is a key driver for the forecasted pre-tax profit CAGR of 21% (2025F-28F) and an ROE projection of 20% in 2025F. Higher valuation potential: CTG deserves a higher valuation than its five-year average (1.4x P/B) due to its improving asset quality, cost of capital advantages, and market share as a state-owned bank.
ACB	32,500	26,000	25%	5.93	17%	1.18	21.50	<ul style="list-style-type: none"> Maintaining high capital efficiency: ACB remains a top-tier bank in the system, backed by strong growth momentum and attractive profitability (forecasted pre-tax profit CAGR of 22% from 2025F-28F). The bank demonstrates solid risk management, having peaked in NPLs as early as Q2/2024, and maintains a stable 10% cash dividend policy. ROE is projected to stay above 22% in the long run, placing ACB among the leading banks in the sector. NPL Ratio Expected to Decline Below 1% by 2026F. Higher valuation potential: ACB could be re-rated above its current 5-year average valuation (1.5x P/B) as profitability improves significantly from 2025F, no longer impacted by the high income contribution from securities trading seen in 2024.
VIB	22,700	20,750	9%	7.10	21%	1.32	19.67	<ul style="list-style-type: none"> Earnings expected to bottom out in 2024, resuming growth on accelerating retail credit and NIM expansion: In Q4/2024, retail loan products showed stronger growth momentum, particularly mortgage loans, which account for 50% of retail credit and surged 5.7% YTD (vs. 0.5% YTD in Q3/2024). Net new NPL formation declined significantly from the previous quarter. Looking ahead to 2025, we expect a favorable economic environment to drive a recovery in retail credit demand, leading to NIM expansion and improving asset quality. ROE projected to improve above 20% from 2025F, supported by profit recovery and a stable cash dividend policy (expected 2025 dividend payout of 7%). Potential re-rating from new strategic foreign investor: The search for a new strategic investor could lead to a higher valuation for VIB. Recent banking deals, such as OCB (2020) and VPB (2023), were priced at 2.3x-2.5x P/B for an ROE range of 21%-25%. Given this benchmark, we believe VIB could be re-rated to a higher valuation in anticipation of a future stake sale, especially after CBA is no longer a strategic investor in VIB.
HPG	35,800	28,000	28%	8.76	70%	1.40	16.00	<ul style="list-style-type: none"> The DQ02 Phase 1 plant (2.8 million tons of HRC/year) is set to begin operations in Q1/2025. Concurrently, temporary anti-dumping duties on imported Chinese HRC, effective March 1, will enhance HPG's competitiveness against imports. Domestic HRC demand: Vietnam's HRC demand is projected to reach 12.5 million tons in 2024, with 70% sourced from imports. The anti-dumping tariffs will level the playing field for local producers. HRC production forecast for 2025: DQ02 (Phase 1) is expected to operate at 70% capacity, enabling HPG to produce 4.9 million tons of HRC (+69% YoY), of which 3.4 million tons will serve domestic demand.

Ticker	Target price	Close price	Expected return	P/E 2025F	NPAT YoY% 2025F	P/B 2025F	ROE% 2025F	Investment thesis
HSG	23,000	19,050	21%	14.11	45%	1.04	7.60	<ul style="list-style-type: none"> Coated steel production recovery: 2025 coated steel output is projected to reach 1.5 million tons (+3% YoY), with domestic consumption rising 15% YoY, supported by a recovering real estate market and an accelerated pace of project launches, alongside HSG's extensive retail network. Margin expansion: Gross margin is forecasted to improve to 11.6% in FY2025, up from 10.8% in FY2024, driven by HRC price recovery and cost efficiency. SG&A and Hoasen Home expansion: SG&A expenses are estimated at VND 4.1 trillion (+8% YoY), accounting for 9.5% of revenue, mainly allocated to expanding the Hoasen Home retail system. Net Profit Outlook: 2025 net profit is expected to surge to VND 838 billion (+64% YoY), reflecting a strong business recovery. Attractive valuation: HSG is trading at a 2025F P/E of 14x and P/B of 1.0x, offering an appealing valuation given its growth outlook and industry position.
KDH	42,745	33,500	28%	38.29	9%	1.58	8.34	<ul style="list-style-type: none"> Two major projects will drive KDH's revenue in 2025: (1) The Privia Project, where 40-45% of the remaining units will be delivered, and (2) The Binh Trung Dong Project Cluster, which is undergoing landscape design enhancements, adding more green spaces, and pursuing BCA Green Mark certification from Singapore's Building and Construction Authority, with sales expected to launch in Q2/2025. The total revenue from project deliveries in 2025 is estimated at VND 6,586 billion. In the first phase of the Vo Chi Cong project, KDH plans to launch the low-rise subdivision with ~200 units in Q2/2025. These units are projected to exceed the USD 8,000/m² benchmark set by Classia, a low-rise project launched in 2023 and recently delivered. The expected selling price is USD 11,000 – 11,500/m² (VND 260 – 280 million/m²). For the subsequent high-rise phase, which includes 600 units, legal procedures are ongoing, and the project is expected to commence in late 2025, with sales beginning in 2026. The estimated selling price for high-rise units is USD 3,500 – 4,000/m².
KBC	40,600	29,700	37%	8.02	567%	1.05	14.00	<ul style="list-style-type: none"> KBC possesses large-scale industrial parks (IPs) in Tier-1 markets, with a total land bank of approximately 2,500 ha across northern and southern Vietnam. Key projects include Nam Son Hap Linh (300 ha), Trang Due 03 (621 ha), Tan Phu Trung (543 ha), Tan Tap (654 ha), and Loc Giang (466 ha). In 2025, KBC anticipates a strong recovery, resolving existing bottlenecks to accelerate development and leasing activities across its IPs. The company expects leased land area to reach 180 ha, a significant increase from 30 ha in 2024. Cash flow from equity issuance and project transfers will play a crucial role in funding future growth. KBC plans to issue 250 million shares (32.6% of outstanding shares) in Q2/2025, raising approximately VND 6,000 billion to support potential project development. Additionally, the Trang Cat Urban Area project is expected to complete its investment policy adjustment in 2025, with potential partial project transfers (~10 ha) in 2026.
SIP	97,000	91,000	7%	16.22	1%	2.57	20.00	<ul style="list-style-type: none"> The total newly leased industrial land area is expected to increase by 30% to 100 ha in 2025, driven primarily by Phuoc Dong Industrial Park (IP), which is forecasted to lease 70 ha (+17% YoY). Phuoc Dong IP holds a competitive advantage with its affordable rental rates (~USD 80/m² per cycle, 50% lower than Tier-1 markets), strategic location near the Moc Bai – HCMC Expressway, facilitating connectivity between Cambodia and Vietnam, and fully equipped utilities (power and clean water treatment) that meet industrial production needs. Additionally, the company is expected to complete land clearance (GPMB) in 2025, ensuring a sufficient land supply for handovers. In Tier-1 markets, the company plans to expand operations at Le Minh Xuan 03 IP, benefiting from Ho Chi Minh City's new chemical hub, while Loc An Binh Son IP is well-positioned to capture demand from factory relocations out of Bien Hoa 1 IP.

Ticker	Target price	Close price	Expected return	P/E 2025F	NPAT YoY% 2025F	P/B 2025F	ROE% 2025F	Investment thesis
REE	84,300	72,400	16%	14.04	22%	1.64	11.71	<ul style="list-style-type: none"> Power segment: Revenue is projected to reach VND 4,878 billion (+17% YoY), with gross profit at VND 2,603 billion (+33% YoY). Hydropower generation is expected to rise to 2.9 billion kWh (+13% YoY), supported by additional capacity from new hydropower and wind power projects. Real estate & office leasing segment: Revenue is forecasted at VND 1,750 billion (+39% YoY), with gross profit at VND 1,055 billion (+15% YoY). Etown 6 office building has reached 38% occupancy, while The Light Square is set to contribute VND 465 billion in revenue (+200% YoY).
PVT	31,500	26,700	18%	7.04	23%	1.06	15.00	<ul style="list-style-type: none"> In the first two months of 2025, oil transport freight rates have shown signs of cooling, with large vessel segments experiencing significant declines, while mid- and small-sized vessels have seen only slight adjustments and remained relatively stable. Given that PVT's fleet primarily consists of mid- and small-sized vessels, we expect its Q1 business performance to remain positive. For the full year 2025, we forecast average oil transport rates to decline moderately by 5-8%, depending on the segment, though they will remain elevated compared to the 2019-2022 period. PVT's revenue growth in oil transportation is expected to be driven by higher crude oil and refined fuel transportation volumes from Binh Son Refining and Petrochemical (BSR) following maintenance, revenue contribution from newly acquired vessels offsetting the mild decline in product oil freight rates, and strong growth across key transport segments, including product oil/chemical transport (+23%), LPG transport (+13.2%), bulk cargo transport (+62.2%), and crude oil transport (+22.4%).
HAH	58,000	53,200	9%	7.08	40%	1.60	21.20	<ul style="list-style-type: none"> The fleet operations have improved significantly, driving a revenue breakthrough. However, container shipping and transport support services face challenges as new vessel supply continues to enter the market. Transport volume is expected to remain flat compared to the high base of 2024, when China ramped up exports to the U.S. between June and August 2024. Freight rates are projected to decline by 7% YoY, pressured by a 5% YoY increase in global vessel supply, particularly impacting Intra-Asia and Domestic routes, where three new GMD vessels are set to enter the market. Charter leasing remains the primary growth driver. Two vessels, HAIAN OPUS and HAIAN GAMA, have been leased at high rates, generating new revenue streams from H2/2024. Additionally, three vessels (HAIAN VIEW, WEST, EAST) have been renewed with a 30% rate increase. In February 2025, HAH received a new vessel, HAIAN ZETA (1,700 TEU capacity), bringing the total fleet size to 17 vessels with a combined capacity of 28,200 TEU. HAIAN ZETA is expected to be leased, replacing HAIAN EAST, which will transition to self-operation. The renewed charter rates for HAIAN WEST and HAIAN ZETA stand at \$27,000/day, representing a 50% increase over previous contracts, with one-year lease terms. Margin expansion is driven by a higher revenue contribution from leasing. The charter segment boasts a gross margin of 60-70%, significantly higher than the 15-20% margin in transportation, supporting HAH's profit growth in 2025.
VCB (*)	114,100	93,300	22%	12.56	23%	2.19	18.99	<ul style="list-style-type: none"> We believe that a more favorable economic backdrop in 2025 will lead to a more aggressive stance by management in driving profit growth, which had been constrained by a cautious approach over the past two years amid economic slowdown. In fact, this renewed focus on growth is already evident, starting with a 16% credit growth target for 2025, the highest since 2019, alongside a potential slight improvement in NIM and a reduction in credit cost ratios. Strengthening capital buffer is also a priority, with plans for a private placement of approximately 5% to foreign investors (potentially executed within this year) and the possibility of retaining earnings for future stock dividends in the coming years.

INVESTMENT THESIS

Sudden profit from THACO's compensation for mechanical industrial parks in the period of 2026 – 2028

- According to our estimates, the total area of convertible rubber land is 900 hectares, which is expected to take about 2-3 years to clear the ground (GPMB). Therefore, we believe that the revenue from this compensation will fall in 2026 – 2028, divided into several installments based on the progress of the land clearance.
- With an estimated compensation of ~2.5 billion/ha (250 thousand VND/m²) from previous transactions, the total value of the compensation is estimated at ~2,250 billion VND.

NTU3 is ready to contribute more to the business

- In 2024, PHR has recorded VND 47 billion in profit shared from NTC when the company begins to hand over NTC3 Industrial Park. In 2025, we believe that NTC will continue to hand over the remaining area of the total 90 hectares signed by Mous, which will significantly contribute to PHR's joint venture profit.
- In addition, NTC is also actively promoting the search for new customers to lease for the remaining area of the project. In 2M2025, it was recorded that 19 hectares were sold, the selling price is estimated at \$160/m², helping to consolidate the profit from PHR's joint venture in the coming years.

The rubber segment has positive expectations when rubber prices remain high

- We estimate PHR's production in 2025 to reach 32,437 tons (+7% YoY) with revenue from the rubber segment in 2025 estimated at VND 1,635 billion (+8% YoY) with an average selling price of 50 million VND/ton.

Business prospects in 2025 – The main business segment is expected to recover, NTU continues to lease NTC3 Industrial Park

- We forecast PHR's revenue in 2025 to reach VND 1,819 billion (+11.4% YoY) and net profit to reach VND 559 billion (+19% YoY). The above forecast is based on the basis of 1/Revenue from the rubber segment grew by 11% thanks to the forecast of rubber prices recovering to the old peak while sales volume remained stable thanks to long-term partners and high product quality. 2) Other income from NTC3 will contribute greatly to the profit of the joint venture

RISK

- The progress of Thaco's industrial park is slower than expected, NTC3 handed over land later than expected, which is expected to affect the company's income forecast.

Yield Spread (*): This indicator represents how the market prices the equity risk premium (ERP) when investing in the listed capital market compared to the risk-free rate with an equivalent investment horizon. The 10-year government bond yield serves as a suitable proxy for the risk-free rate. The chart illustrates the probability distribution of the yield spread over the past five years. Statistically, 70% of yield spread fluctuations occur within one standard deviation.
